

NEXT GENERATION PLATFORM FOR IT AUTOMATION & ORCHESTRATION

A force multiplier for IT and security operations

EXPERIENCE THE NEXT GENERATION OF IT AUTOMATION

Ayehu acts as a force multiplier, driving efficiency through a simple and powerful web-based IT automation and orchestration platform for IT and security operations. Ayehu helps enterprises, managed service providers (MSPs) and managed security service providers (MSSPs) **save time** on manual and repetitive tasks, **accelerate mean time to resolution**, and **maintain greater control** over IT infrastructure. As a web-based, agentless platform, Ayehu is easily deployed, allowing you to **rapidly automate tasks** and processes, across disparate solutions and systems.

EASY TO USE AND OPERATE

Easy to use workflow designer enables rapid adoption and time-to-value, with an extensive pre-built library of activities and end-to-end customizable templates.

HIGH AVAILABILITY & SCALABILITY

Deployed at major enterprises, supporting thousands of business processes, Ayehu effortlessly scales to support organizations with a significantly high volume of incidents, workflows and activities. Ayehu can be deployed on-premise and in private and public clouds.

INTEROPERABILITY ACROSS IT AND SECURITY SOLUTIONS

Extends and unifies comprehensive workflow automation across disparate systems and applications, through out-of-the-box integration packs with IT and security solutions and services, including McAfee ESM, ServiceNow, SolarWinds, and more.

MACHINE LEARNING DRIVEN DECISION SUPPORT

Leveraging proprietary, sophisticated machine learning algorithms, Ayehu provides decision support via suggestions to optimize your workflows and dynamically create rule-based recommendations, insights and correlations.

TRUSTED BY OVER 130 BUSINESSES

LexisNexis®

Capgemini

Cognizant

HOW IT WORKS

Ayehu helps **reduce labor-intensive manual IT and security tasks** and processes, providing an intuitive automation platform that **automates key processes** such as system, network, security incident investigation and remediation playbooks, and application tasks. You **maintain full control**, by embedding human decision points within workflows.

Using bi-directional communication steps, you can **remotely control** the advancement or execution of any step within a process, such as restarting a server. Remote communication can be performed via SMS, IM, email, phone, or Chat-bot.

Ayehu Workflow Designer

KEY FEATURES & BENEFITS

Get work done while you sleep with the **Workflow Scheduler**, allowing you to execute non-critical tasks outside business hours.

Receive alerts for selected events to enable **remote control** of incidents.

View the **Audit Trail**, displaying the logged details of each workflow executed (time, activity, status, result, etc.).

Associate workflows with keywords through **Tags** to quickly search and return commonly used workflows.

Rollback changes to workflows, with **Version Control**, allowing you, to review, compare, and revert to previous versions if necessary.

Easily set **Workflow Permissions**, ensuring proper access levels to team members.

SEAMLESS INTEGRATIONS

Extends and unifies comprehensive workflow automation across disparate systems and applications, through out-of-the-box integration packs with IT and security solutions and services.

*Our flow delivery has been streamlined and is **much faster and easier than ever before**. Some of our workflows have been created in just minutes – a far cry from the hours of painstaking work they used to take. Because workflow creation is faster, my team is **saving time**, which results in a marked **increase in efficiency**. Delivery quality has also improved, because logging is more detailed than before. We can now trace and find workflow bugs and fix them in real-time.*

System Team Leader, Ness Technologies

HOW AYEHU HELPS YOU

IT OPERATIONS/NO
BE AGILE. PUT MANUAL, REPETITIVE TASKS ON AUTO-PILOT

Ayehu helps organizations deliver superior **SLA performance** by automating manual, repetitive tasks and orchestrating workflows between critical IT systems in one, unified IT automation platform.

SECURITY OPERATIONS
IMPROVE SECURITY INCIDENT RESPONSE TIMES AND REDUCE RISK

Ayehu helps organizations automate the ever-expanding complexity of cybersecurity operations and incident response. With Ayehu, organizations improve incident response time and overall **SOC effectiveness** by automating incident response playbooks.

MANAGED SERVICE PROVIDERS
REDUCE DOWNTIME AND DO MORE WITH LESS

If you're like most MSPs, you know all too well the pressure of finding new ways to do more with less, keep up with SLAs and **reduce costs**. Ayehu provides a comprehensive, unified platform from which to centrally manage, automate, and support your service delivery.
