ParkHolidays uses Harmony Purple for Security Controls Effectiveness

Park Holidays, the leading caravan park provider in the south of England, requires a solution that would identify potential threats to their key assets 24/7.

COMPANY SUMMARY

With 31 caravan holiday parks across the southern UK coastline from Devon in the West to Suffolk in the East, Park Holidays is the largest provider of caravan holiday parks in the south of England.

Deal Size: 4000 IP

CHALLENGES

Park Holidays discovered that human pen testing was not enough as hackers still managed to find their way in. Park Holidays was looking for an alternative that is more efficient and works 24/7.

SOLUTION

Orchestra Group has developed Harmony Purple, a next-generation vulnerability prioritization tool (VPT) that continuously showcases validated, global, multi-vector Attack Path Scenarios™ (APS), so organizations can focus their red team's and blue team's time and resources on those compensating remediation process that increase the security of their critical assets and business processes. It provides a map of global attack path scenarios, so you can fix only the vulnerabilities that matter. Once Harmony Purple was installed across the hotel chain, our value was immediately obvious.

BENEFITS

- Quick installation.
- In-house IT can manage Harmony Purple. There is no need for outsourced testers.
- Continuous operation 24/7 that matches today's dynamic and cloud-based environment.
- Extremely low false positives.
- Actionable business and security insights.
- Competitive pricing.
- Intuitive dashboard.
